## SUMMARY

Founder of a successful tech agency and seasoned Python mentor with a proven ability to turn ideas into real-world solutions. I train and empower developers to build with clarity, precision, and purpose. Known for creating scalable systems, automating workflows, and driving results. I don't just teach code—I build coders ready to lead in tomorrow's tech landscape.

## WORK EXPERIENCE

### WALKAROO INTERNATIONAL PVT LTD
*AI Tools Trainer : Zapier, Chat GPT, Perplexity, Cursor*

- Conducted hands-on training sessions for teams on cutting-edge AI and automation tools like Zapier, ChatGPT, Perplexity, and Cursor.
- Designed custom workflows using Zapier to automate internal operations and boost efficiency.
- Taught practical prompt engineering and advanced use cases of ChatGPT for marketing, HR, and decision support.
- Trained staff on Perplexity for high-quality, real-time research and business intelligence.

### CODING ZEN
*Coding Mentor : Python, Web Development and AI/ML*

- Guiding learners of all ages—from kids to adults—in Python programming, web development, and AI/ML, adapting teaching style to individual skill levels and objectives.
- Creating engaging, project-based learning experiences that translate complex tech concepts into real-world, interactive applications.

### VISHWAS CA

- Collaborated directly with the founders to grow the firm's digital presence, aligning tech initiatives with business goals.
- Led efforts in website design, development, and performance optimization, ensuring seamless UX and responsive rendering across devices.
- Advised on digital strategy, content structure, and SEO to improve visibility and client engagement.

## PROJECTS

### STOCK_BOT                                                                    *Github*
Built an AI-powered financial analysis bot capable of reading complex balance sheets, extracting key insights, and generating future financial predictions using deep learning models trained from scratch.

### CASESNAP AI                                                                  *Github*
AI-powered platform for pre-institution mediation, automating legal intake, predicting outcomes, and supporting ADR methods to expedite dispute resolution.

### SENSORFAULT DETECTION                                                        *Github*
Designed a machine learning-based fault detection system for sensors, identifying anomalies to enhance reliability and reduce maintenance costs.

### TASK MANAGER                                                                 *Link*
A productivity-focused web application that allows users to create, organize, and manage daily tasks efficiently while tracking progress and boosting personal accountability.

## TECHNICAL SKILLS

- **Skills**: Agentic AI, Machine Learning, Deep Learning , NLP , LLMs , Gen AI (Langchain), Data Scraping
- **Frameworks & Libraries:** TensorFlow , PyTorch , Langchain, Flask , Express.Js, React, BeautifulSoup, Scrapy, Selenium, Playwright,

## CERTIFICATES AND ACHIEVEMENTS

KrishNaikAcademy Certified: Agentic AI Developer
Infosys certified Web development with node.js and MongoDB

## EDUCATION

### Dayananda Sagar College Of Engineering                                       2023-2027
B.E in Computer Science And Design Engineering                                   CGPA:9.00
